### PROFESSIONAL SUMMARY:

A Software Engineer valued for driving quality and consistency all through the software development lifecycle. Collaborating effectively with backend engineers, frontend engineers, business analysts, UX designers and QA while applying agile development methodology throughout the product lifecycle to produce high-quality, user-friendly, scalable and less buggy applications.

With years of practice as a professional, I have an accumulated experience in the use of JavaScript, .NET technologies, PHP, and Python in application development, while working in full time roles and also as a freelancer.

### SKILLS:

- Technical Writing/analysis
- Software Development
- Relational Databases
- Public Speaking and Human Management
- JavaScript
- Advanced knowledge of PHP
- C# and .NET Technologies
- Python
- Apollo GraphQL
- CSS and Java (Spring)
- Non-relational Databases
